Installation Drawing

Dimensions / Material

Type	Length	Min. Airflow	Max. Airflow	Material
D12	335 mm	5 m ³ /h	20 m ³ /h	AISI 304/316 (V2A/V4A)
D24	630 mm	8 m ³ /h	68 m ³ /h	AISI 304/316 (V2A/V4A)

JetFlex® CBD SS Coarse Bubble Diffusers are equipped with a ¾" NPT external thread. A deflector on the bottom prevents the accumulation of debris and minimizes the need for maintenance.

SS Coarse bubble diffusers are mainly used for high corrosive and high temperature effluents that need thorough mixing capabilities. The rising air induces a strong current, thus removing sludge from the bottom of the tank. They are therefore a very good alternative for many mechanical aeration systems.

Specific standard oxygen transfer is around 2 %/m and aeration efficiency is approx. 1.5 kg O₂/kWh. Headloss is marginal for airflow of up to 40 m³/h.
