Pre-treatment unit

STV/T - COMPACT PLANT FOR CESSPOOL ACCEPTANCE

In this model of combined machine the waste water discharged from the tank truck is filtered so as to remove the solid parts, more coarse, and then conveyed into a tank where settling occurs of the sands, subsequently removed with a system of screws. As an option is provided a system for removal of fats / oils floating.

Features

- Filtration
- Wash / compaction of solids removed
- Grit removal
- Degreasing

Advantages

- No odor
- No obstructions
- Low operating costs and maintenance
- Compactness of installation
- Construction work is not necessary
- Easy installation and management
- Low residual content of organic matter
- Reduction of up to 40% by volume of the solid removed
- No pumps

MANUFACTURING FEATURES	
Inlet flow rate	up to 100 m³/h
Filtering options	ø 3 ÷ ø 7 mm holes
